with data gathering
in storage engineering

for crane control
with additional safety
function and data
feedback

for vehicle control
with LCD-Display and
data feedback

K2 plus

- the big brother of the K2 standard with the same characteristics
- big-surface panel with enough room for a display or also for plenty operating elements

GF-T23 the new member of the GF transmitter family

can be operated easily with gloves

extremely small design

- 100% KASYS compatible => for most types of cranes
- a robust stainless steel handle protects the switches from damage and unintended operation
- easy mounting and adaption
- robust and reliable
- compact and yet easy to service
- with a small-size changeable power-pack

tried and tested
7,2V power pack
